NOTICE OF WATER METER INSTALLIATION

The Seven Mile Water Department has received a grant to install cellular water meters to replace existing meters in village homes. The new meters can then be read remotely.

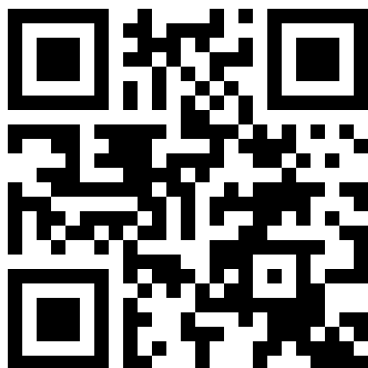

Newman Plumbing, the contractor installing the new meters, is currently in the process of making appointments for meter replacement.

The process usually takes 10 to 15 minutes. The installer will be driving a company truck, wearing a company shirt and has an ID.

A Newman Plumbing Employee will be knocking on doors and when needed, reaching out via phone and postcard to make appointments with residents to replace current water meters.

Thanks to the grant funding the new meters are being installed at no cost to residents or the village.

For all concerns or questions please call Seven Mile Water Department Superintendent Greg Saurber at 513-726-9000.
